Three-phase	\$62.97 per month

Distribution Demand Charge:

Determination of Billing Demand:

The demand for billing purposes each month shall be higher of the following:

1. The maximum integrated 30-minute demand measured during the month for which the bill is rendered.
2. Fifty percent (50%) of the maximum monthly demand, which occurred during the past 12 months.

3. The minimum bill as stated in applicable service agreements.

Power Factor Correction:

When the average monthly power factor of the member's power requirements is less than 85%, the Cooperative will correct the integrated demand in kilowatts for that month by multiplying by 85% and dividing by the average power factor in percent for that month.

Payment:

Bills under this schedule are net and are due and payable at the office of the Cooperative when the bill is rendered. Bills are considered past due after twenty-five days and service is subject to be disconnected after due notice.
