

BLUE RIDGE ELECTRIC MEMBERSHIP CORPORATION

Schedule Number: 3.5

ELECTRIC RATE

SCHEDULE I – INDUSTRIAL SERVICE

Availability:

Available to manufacturing or commercial members for full time permanent service where the maximum monthly demands average at least 1,000 kW over the most recent twelve months or the annual energy requirements are at least 6,000,000 kWh.

Membership:

Each consumer receiving service under this schedule shall be a member of the Cooperative and agrees to comply with the bylaws and abide by all service rules and regulations as adopted by the Cooperative's Board of Directors.

Type of Service:

The Cooperative will furnish 60-cycle service through one meter at one of the following approximate voltages where available:

- Three-phase, 208Y/120 Volts, 480Y/277 Volts, 4160Y/2400 Volts, 12,470Y/7200 Volts, or
- Three-phase, Three Wire, 480 Volts, 2400 Volts, or
- Any other three-phase voltage subject to mutual agreement between the Cooperative and the member.

The type of service supplied will depend upon the voltage available. Prospective members shall enter into a contract with the Cooperative that will ascertain the available voltage and the date of service before purchasing equipment. All motors must be of types approved by the Cooperative with minimum starting current and with controlling devices where necessary.

Monthly Rate:

The monthly rate consists of three components: The appropriate basic facilities charge, the distribution energy charge, and the energy supply charge.

Distribution Service:

Basic Facilities Charge:	\$968.80 per month
Distribution Demand Charge:	
First 3,000 kW of Billing Demand	85¢ per kW of billing demand
Over 3,000 kW of Billing Demand	60¢ per kW of billing demand

Block 1 Distribution Energy Charge*:	
First 200 kWh per kW of Billing Demand	2.83¢ per kWh
Next 200 kWh per kW of Billing Demand	2.71¢ per kWh
Over 400 kWh per kW of Billing Demand	1.52¢ per kWh

Block 2 Distribution Energy Charge*:	1.35¢ per kWh
--------------------------------------	---------------

Wholesale Power Supply Service:

Supply Demand Charge:	
First 3,000 kW of Billing Demand	\$3.90 per kW of billing demand
Over 3,000 kW of Billing Demand	\$3.37 per kW of billing demand

Block 1 Energy Supply Charge*:	
First 200 kWh per kW of Billing Demand	5.67¢ per kWh
Next 200 kWh per kW of Billing Demand	3.38¢ per kWh
Over 400 kWh per kW of Billing Demand	3.08¢ per kWh

Block 2 Energy Supply Charge*:

SCHEDULE I – INDUSTRIAL SERVICE

Schedule Number: 3.5

First 200 kWh per kW of Billing Demand	5.67¢ per kWh
Next 200 kWh per kW of Billing Demand	3.38¢ per kWh
Over 400 kWh per kW of Billing Demand	3.08¢ per kWh

*Block 1 kWh is the lesser of (a), the total kWh for the month, or (b) the total for the month divided by the billing demand times 3,000 kW. Block 2 kWh is the difference between (a) and (b) if (a) is greater than (b). There will be no kWh in Block 2 if (a) is not greater than (b). The billing demand for calculating the Block 2 kWh per kW amounts is the billing demand in excess of 3,000 kW, if any. The billing demand for calculating the Block 1 kWh per kW amounts is the lesser of the actual billing demand or 3,000 kW.

Determination of Billing Demand:

The demand for billing purposes each month shall be higher of the following:

1. The maximum integrated 30-minute demand measured during the month for which the bill is rendered.
2. Forty (40%) of the maximum monthly demand, which occurred during the past 12 months.

Minimum Bill:

The minimum monthly bill shall be the highest of either:

1. The above stated charges.
2. The basic facilities charge plus \$0.75 per kVA transformer capacity serving the member. The kVA shall be the rated capacity of the installed transformer(s) dedicated for service to the member; provided, however, that Cooperative, at its discretion, may assign transformer capacity based on the member's requirements when transformers are shared or when otherwise justified by the circumstances.
3. The minimum bill as stated in applicable service agreements.

Power Factor Correction:

When the average monthly power factor of the member's power requirements is less than 85%, the Cooperative will correct the integrated demand in kilowatts for that month by multiplying by 85% and dividing by the average power factor in percent for that month.

Payment:

Bills under this schedule are net and are due and payable at the office of the Cooperative when the bill is rendered. Bills are considered past due after twenty-five days and service is subject to be disconnected after due notice. A deposit as specified in the Cooperative's Service Rules and Regulations may be required.

Service Agreement:

Each member shall enter into a service agreement with the Cooperative before service can be supplied.

Wholesale Power Cost Adjustment:

The above charges per kWh will be increased or decreased by 0.00001 cents per kWh or major fraction thereof, adjusted for line loss, by which the Cooperative's cost of purchased power per kWh exceeds or is less than Factor B of Schedule 8.1 - Wholesale Power Cost Adjustment Clause.

Capital Credits:

The cost of providing service to members billed under this schedule shall be determined at the close of each fiscal year. All monies received in excess of the cost of operating the Cooperative to provide service shall be allocated to each member at the close of each fiscal year based on the dollar amount paid on the base rate and credited to the member's capital credits account to be refunded as provided in the Bylaws.

North Carolina Sales Tax:

The above rate does not include North Carolina sales tax. Any applicable sales tax will be computed and included on the bill.

Effective on bills rendered after October 1, 2019 Approved by Board of Directors September 26, 2019
